Equity Pool - Equity Sectors (Morningstar)

Portfolio Date: 6/30/2017

Purpose

The purpose of the Equity Pool is to facilitate the funding of current and future charitable needs of participating charitable funds and organizations. The long term investment objective of the Equity Pool is to obtain broad equity market exposure utilizing a passive, cost effective approach that is diversified across market capitalizations and regions. A secondary objective is to provide cash flows to fund distributions and to preserve the purchasing power of the funds to meet charitable needs now and in the future.

Intermediate-Term Fixed Income Pool

As of 6/30/2017

Trailing Returns

Int-Term Fixed Income Pool & Blended Benchmark	Year to Date	Quarter	1 Year	3 Years Annualized	5 Years Annualized	10 Years Annualized
Intermediate-Term Fixed Income Pool TR	2.58	1.40	-0.17	2.61		
Intermediate-Term Fixed Income Benchmark	2.51	1.42	0.03	2.76	2.65	

Purpose

The purpose of the Intermediate-Term Fixed Income Pool is to provide capital preservation and current income to help meet spending requirements of donor portfolios. The Pool will utilize a passive, cost effective approach with a secondary objective to provide broad exposure to U.S. income markets. The Pool is diversified across U.S. Treasuries notes and bonds, corporate bonds, bank loans, mortgaged-backed securities and U.S. Treasury Inflation-Protected Securities. The average effective duration and interest rate risk of the Pool will be commensurate with broad fixed income benchmarks such as the Barclays U.S. Aggregate Bond Index.

Inception Date: January 1, 2014

Performance is presented gross of administrative fees but net of all investment management fees, brokerage, consulting and other transactions costs.

Estimated Pool Investment Management Fee: .09%

Purpose

The purpose of the Short-Term Fixed Income Pool is to provide capital preservation and current income to help meet spending requirements of donor portfolios. The Pool will utilize a passive, cost effective approach with a secondary objective to provide broad exposure to U.S. income markets. The Pool is diversified across U.S. Treasury notes and bonds, corporate bonds, bank loans, mortgaged-backed securities and U.S. Treasury Inflation-Protected Securities. The Pool will have a lower average effective duration than broad fixed income market benchmarks such as the Barclays U.S. Aggregate Bond Index, hence limiting overall interest rate risk.

Money Market Pool

As of 6/30/2017

Purpose

The purpose of the Money Market Pool is to provide liquidity for participating charitable funds and organizations in funding grant making and payment of fees and administrative costs while providing desired principal stability. The long term investment objective of the Money Market Pool is to seek a competitive market return to preserve and grow the portfolio, provide cash flows to meet charitable needs now and those in the future. As such, the Money Market Pool is highly liquid, which enables donors to access funds for grants in a timely manner. The Money Market Pool invests in bank deposits and obligations of the United States government and its agencies.

Investment Commentary—June 30, 2017

Over the last 50 years economists and investors have been conditioned to adjust economic data for inflation. Such adjustment was not needed until the 1970's when inflation began a sustained acceleration. Inflation almost came to be regarded as a constant, with the cost of living growing at a seemingly steady 3% per year. With real output also growing at an average of 3% per year, policy makers could count on 6% growth in the nominal value of the economy when planning for the future. In the wake of the 2008 Financial Panic these rules of thumb no longer apply. Real growth has been on the order of 2% per year while inflation has been less than 2% per year. The Federal Reserve's goal has been to increase the inflation rate up to (and maybe beyond) the 2% level. For the most part, they have fallen short of the inflation goal on a sustained basis.

With subdued economic growth and a lack of pricing power, businesses and investors have looked overseas for growth. Until recently, the strength of the U.S. dollar's exchange rate (illustrated below) hampered export growth for businesses. The strong dollar also reduced the returns of overseas stock and bond markets for U.S. investors as the returns were translated back into U.S. dollars. However, since the beginning of the year

the level of the dollar's exchange rate has come down significantly. This reduction takes pressure off of U.S. businesses doing business abroad. To some extent, a weaker dollar also alleviates concerns of a liquidity crisis in emerging markets as many emerging market governments and businesses have loans that must be repaid in dollars while their revenues are based in local currencies. A weak dollar makes those loans easier to repay.

The Equity Pool has benefited this year from its allocation to foreign markets. The Equity Pool had a total return of 3.78% in the quarter and 10.44% year-to-date. Performance was led by both the Vanguard Developed Markets and Emerging Markets funds with year-to-date returns of 14.70% and 14.76% respectively. As noted in the previous Investment Commentary, the Investment Committee increased the allocation to developed markets in April by 3% to 23% of the total Pool.

The Intermediate-Term Fixed Income Pool had a total return of 1.40% in the second quarter bringing the year-to-date return to 2.58%. Both investment grade and below-investment grade corporate bonds performed well during the quarter as their yields showed significant declines versus a minimal yield decline for U.S. government bonds. Lower yields drive bond prices higher. The yield to maturity on the Intermediate-Term Pool began the year at 3.10% so the Pool has come close to delivering a full year's yield to maturity in the first six months of the year.

The Short-Term Fixed Income Pool had a total return of .58% in the quarter and 1.08% since the beginning of the year. The Federal Reserve Open Market Committee voted to increase the overnight rate by a quarter point in both December and March. Thus, the yield on two year Treasury notes increased while yields on five year notes decreased slightly in the quarter. This shift in the yield curve enabled the Short-Term Pool to earn a return commensurate with its yield-to-maturity during the quarter.
